

10 QUESTIONS TO ASK YOUR VIDEO MONITORING PROVIDER BEFORE YOU BUY

A video monitoring system provides protection to a business by deterring threats or break-ins, protecting inventory or even identifying improper use of company equipment. To be sure you get the system your business needs today and into the future, here are 10 key questions to ask a video monitoring provider.

1 What is the picture quality of the camera(s)?

- Will the cameras be in High Definition?
- Are there zoom capabilities?
- Do the cameras have infrared filters for nighttime viewing?

2 How does the installation process work?

- How long will it take?
- Will the installer be able to make appropriate recommendations on where to place the cameras?

3 How will the footage be stored?

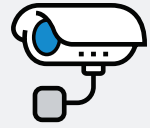

- Will they use a cloud-based system or a DVR system?
- What are the benefits to each?
- How long can the footage be stored for?

4 What will the cost of the monitoring system be?

- Will you have to buy the cameras at your own expense?
- Can you lease the cameras at a lower price?

5 How will you be billed for your monitoring system?

- How often will you be billed?
- Can you bundle your system with other services like your Internet and WiFi?

Checklist
